

User Stories

For each high-level requirement listed in your BRD, write at least one user story. Keep in mind that some features require more than just one user story!

The functional requirements of Vind aka Vela and the user stories for each requirement is below

Note:

- The stories are created for product owner, designer, developer, and the user to accomplish the objective of Vind aka Vela provide users the ability to customize their water sport dashboard and make better decisions to have enjoyable time at the water
- The stories are created based on the functional scope of the Vind aka Vela app.
- Additional stories might be added based on the project scope inflation and break the existing stories into smaller pieces based on the complexity and duration completing the story

User Onboarding/Walkthrough

- As a designer, I want to create intuitive onboarding screens to accommodate the user right away into the application
- As a developer, I want to develop the onboarding screens and let the user go through the same to get familiar with application features
- As a developer, I want to include the walkthrough/ onboarding feature in the navigation menu so that user will be able to go through the features of the application quickly when in the application

App navigation & user account

- As a designer, I want to create an easily accessible user menu that contains primary features of the applications including user account for the user to navigate the application with ease
- As a designer, I want to create user flows to create simple information architecture that helps user find the necessary option with ease
- As a user, I want to find the primary features of the application at one place, so that I could navigate to different features of the application at any given time
- As a user, I need a user account feature to update billing details and password
- As a developer, I want to develop user menu and user account interfaces for user to navigate the site and update account details

User dashboard

- As a product owner, I want to finalize the list of water sports the Vind aka Vela app is going to support to help the developer to begin investigation on accurate and reliable data

- As a developer, I want to investigate on the accurate and reliable weather data source, predictions algorithm based on the weather factors opted, and building API
- As a designer, I want to design user dashboard with the finalized list water sports and display the weather factors related to the water sports so that user has the ability to customize the water sports factors and plan the trip
- As a user, I want to customize the dashboard with weather, wind, and wave factors based on the location and water sport to plan the trip

Trips history

- As a developer, I want to investigate and come up with a solution (database and API build) to save user trip history to help users track their water sports trips
- As a designer, I want to create user trip history with filter option to help users track their trips and filter based on calendar date limit
- As a user, I want to see my water sports trip history to plan future trips and ability to delete my trip history

Pro-user purchase

- As a product owner, I want to research and finalize the pro features for the pro-users of the application to allow pro-users to utilize the same and plan their trips better
- As a developer, I want to develop functionality that makes pro-features availability only for pro-users and allow users to go pro if user is interested (Handle the billing)
- As a designer, I want to create pro features in the dashboard for the pro users to access and customize their dashboard and plan their time at the water
- As a user, I'm interested to become a pro user to access pro features of the application to plan my water sports trip to be enjoyable
- As a pro user, I want to access pro features and customize my dashboard based on the weather factors to plan enjoyable water sports trip
